

NATURAL MAKERSPACE

OCTOBER 16-19

HACKING HALLOWEEN NATURAL MAKING STYLE

Go outside with your class and find the perfect trail or outdoor space and design the spookiest space possible. Spooky trail, beach, field, corner of school building. Be creative with the outdoor space you have close by.

OCTOBER 22

WHAT IF YOUR OUTDOOR CLASSROOM WAS WAITING FOR YOU?

Join us virtually to share and discuss your Natural Makerspace, the materials you have access to and things you made or learned outside since the beginning of the school year. This is a GREAT opportunity for students to express themselves and proudly share their work with other students from all around Atlantic.

TAKE ME OUTSIDE DAY

OCTOBER 21

We are encouraging teachers to take their students outside on October 21th, nationwide Take Me Outside Challenge Day, to explore a new Natural Makerspace.

What can students create, make, invent, learn using natural elements like leaves, branches and bark (on the ground), clay (near water) or other materials? Visit the Natural Making projects on Flipgrid to get inspired or/and to inspire others. Students and teachers, share your discovery or what you have created from your discovery:

<https://flipgrid.com/e2e5370a>
