

# CREATE YOUR OWN OUTDOOR CLASSROOM

## OUTDOOR ACTIVITY

### Introduction:

What if you could bring your classroom with you at any site you choose to explore? What if one versatile item is enough to explore and learn a day in nature?

### Activity:

Make an outdoor brilliant bucket to carry all your tools and bring back samples of your exploration.

### Objective:

What are the specific characteristics of the nature area you are exploring (water, field, forest)? What is your goal for the day? What tools will you need? What would you need to add to your bucket regarding the weather forecast for the day?

### Tools:

Bucket, tools (anything you think will be needed during your outside exploration)

### Prep:

Where can we find free buckets? Contact restaurants, markets, cafeterias in your area. They receive food products in surprisingly durable buckets and then throw them away.

**SHARE!** When you finish your project. Take a picture or video and share it with us
