

BUILD A HOME COMPOSTER CHALLENGE

Introduction:

Create a backyard composter that could divert most if not all of your vegetable food waste from the landfill. This is a project in three stages. (1) Identify food waste in your household that could be easily diverted. (2) Create a container/space inside your house easily accessible to you food preparation area, where your vegetable waste can be stored short term before moving to your main composter. (3) Identify a space and gather materials for your outside composter area.

Challenge:

Challenge is to divert a percentage of your household waste to your new compost bin.

Objective:

Build an outdoor composting area for vegetable waste composting

Tools:

You will need your parents' help with this. Also common gardening tools (shovel, rake) some waste wood materials (old pallets, wooden packaging. waste wood ends). Screws and drill/driver.

Prep:

Select a piece of ground in your backyard that could host your composting area. Find some waste materials that you could use to start setting up the space

SHARE!

When you finish your project. Take a screenshot or video and share it with us [#MakerFun](#)

#MakerFun DAILY CHALLENGE

Join us every week day at 10am AST for a new **Make-At-Home** activity & 1pm AST for an **Outdoor activity** or a **Digital Learning** skill while schools are closed.
