

MAY THE FOURTH be with you **CHALLENGE**

Introduction:

Can you use the force? You are the chosen one to bring balance to the forces. There are invisible forces all around us, that we can't see but we can see what they do. How can you use them to make a droid move? Droids are designed to do specific functions. Create a cardboard inspired Star Wars droid and use the invisible forces around you to make it move. Research the invisible forces that are present in our everyday lives.

Challenge:

Use invisible forces around you to make a droid move.

Objective:

Construct a paper roll droid and a course for it to follow.

Tools:

Star Wars ships are made with fictional materials like ferroceramic and laminasteel, you won't need those here. Magnets, toilet paper roll tube, cardboard, popsicle sticks, paint, paint brushes, binder clips, masking tape, scissors, pencil, glue, egg carton.

SHARE!

When you finish your project. Take a screenshot or video and share it with us [#MakerFun](#)

MAKERFUN

DAILY CHALLENGE

Join us every week day at 10am AST for a new **Make-At-Home** activity & 1pm AST for an **Outdoor activity** or a **Digital Learning** skill while schools are closed.
